A Prathima Enterprise

A stride into manufacturing could mean many things for a business group. For us it was about our ability to steer and revive manufacturing units, leverage our ability to manage human and monetary capital and lastly the challenge of consistently meeting stringent manufacturing standards.

This is the back drop for the Prathima Group's forays into gas cylinder manufacture and extrusions under the banners of Prathima Industries and Prathima Extrusions respectively.

Prathima Industries

Located close to Hyderabad at Bibinagar on the Nalgonda highway this manufacturing plant is associated with India's oil companies to produce and deliver gas cylinders to their exacting standards.

Fully equipped and integrated from material to finished product, the Prathima Industries has earned reputation of adhering to the stringent quality standards laid down by the oil companies in India. The plant has a capacity to manufacture 50000 gas cylinders per annum. Working under the close supervision of the oil companies Prathima Industries has consistently delivered on quality.

Close to 250 personnel work to meet the challenges of supply and timely production. The plant is equipped with all the mandatory testing equipment necessary to make the gas cylinder a 100% safe.

What works for us

Quality material

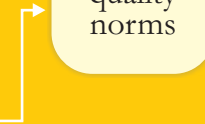

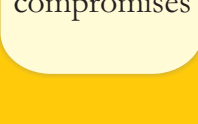

Attention to standards

No compromises

Follow through and 'connect' between departments

Additional quality norms

Integration
